Section Slide as Header Level 1

Slide Title as Header Level 2

Subtitle as Header Level 3

You can put any content here: text, images, tables, code blocks, and so on.

- ▶ first unordered list item
 - a sub item
- 1. first ordered list item
 - 1. a sub item

Additional Theme Functions

Some extra things you can do with the clean theme

Clean ships four inline helpers. Under Mosaic each one is native Typst or a stock component, so the deck defines nothing of its own:

- `alert()` becomes **a run in the second accent**
- `fg()` becomes **an ordinary text fill**
- `bg()` becomes **a native highlight**
- `.button` becomes **Summary**

A Table

Native Typst, with the stroke stated once in the theme

Specification	Estimate	Std. error	N
Pooled	0.42	0.11	4 812
With controls	0.38	0.12	4 812
Region fixed effects	0.35	0.14	4 780

Summary

Quarto Clean Typst Theme

While Clean is a Touying theme, it is designed to be used from [Quarto](#).

- ▶ Markdown syntax, code execution, and Quarto's own layouts
- ▶ `keep-typ: true` hands you the generated Typst back

Under Mosaic

- ▶ `preamble.typ` extends Mosaic's Default definition rather than restating a look
- ▶ It overrides two colors, the type, and two layouts, and adds five rules
- ▶ The deck itself defines nothing at all
